Frank Filas, Reclamation Engineer

RE:

Field Visit, To White Jack Mine, ACT/015/023, Emery County,

Utah

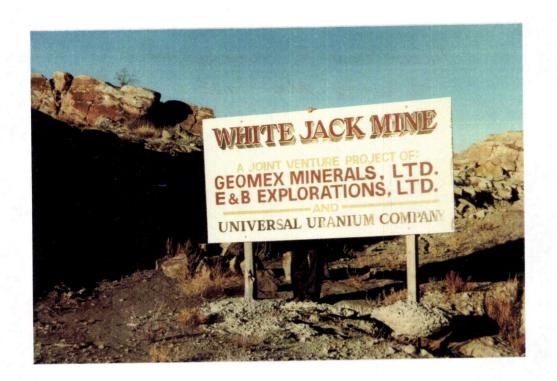

On November 20, 1986 Frank Filas visited the White Jack Mine site near Green River. The White Jack is an inactive underground uranium mine on BLM land. It is located just north of Atlas's Four-Corners Mine and west of the Probe Mine. The 1986 assessment work was done by Imperial Metals Corp for:

Energy Benefits Corporation 1800 Glenarm Place, Suite 300 Denver, Colorado 80202

The site consists of a decline, a 1/2 acre pad area, and a narrow access road of about 1/3rd mile. The total disturbed area is approximately one acre. No obvious hazards exist at the site. The area is clean and the decline is adequately secured with heavy gauge cyclone fence.
